FABSHOP

FLUIDS

FLUID360™ SOLUTIONS
PRODUCTS AND SOLUTIONS FOR INDUSTRIAL MANUFACTURING

Fabrication **SHOPS.**

There are numerous operations in fabrication shops that require the use of fluids. These operations include sawing, drilling, plasma cutting, water jet cutting, bending, threading, tapping and welding. Ashburn's line of fab shop fluids helps create a more efficient workflow and protects your process.

ASHBURN'S LINE OF FAB SHOP FLUIDS INCLUDE:

- Coolants for drilling, sawing, threading and tapping
- Torch coolants, plasma bed fluids and water jet table fluids
- Anti-spatter and cleaners for welding
- Rust inhibitors for in-process protection and storage

DRILLING AND SAWING FLUIDS

Drilling and sawing fluids are designed to improve and maintain the life of your tools, increase productivity, and protect product finish.

Ashburn's line of drilling and sawing fluids protects your production by:

- Removing chips more efficiently
- Providing better workpiece control
- Creating more accurate cuts
- Protecting surface finish
- Preventing biological growth

PLASMA BEDS / WATER JET TABLES

Plasma table and water jet table fluids are specifically designed for CNC plasma cutting and water jets. They contain anti-rust, anti-foam and anti-bacterial additives.

Ashburn's line of coolants for plasma beds and water jet tables protects your production by:

- Protecting beds and workpieces from corrosion
- Preventing biological growth
- Preventing hot spotting
- Increasing production speed
- Improving surface finish

WELDING

Ashburn Anti-Spatter is a clean, water-based product for use in welding operations to prevent the adherence of spatter. It is a dual-purpose product that can also be used to clean and degrease the workpiece prior to welding.

Ashburn's Anti-Spatter for welding protects your production.

- Water-based formula
- Safe, non-flammable, biodegradable
- Contains no silicone
- Protects workpieces, fixtures and equipment

RUST INHIBITORS

Ashburn manufactures rust preventive oils and solutions to protect metals from rust and corrosion. These solutions include water-based, solvent-based, and oil-based formulas for short-term or long-term protection. Products include corrosion inhibitors for in-process protection as well as for the protection of parts in storage and shipping.

Ashburn's line of rust preventives protect your production by:

- Protecting workpieces from corrosion
- Providing multi-purpose in-process and storage protection

PROTECT YOUR PRODUCTION. GO BEYOND.
